Informatics graduate from Universitas Negeri Padang with a strong focus on web development and software engineering. Experienced in developing and maintaining web applications, integrating databases, and troubleshooting technical issues. Possesses strong analytical thinking and problem-solving skills, with additional knowledge of data analysis, machine learning, and artificial intelligence through academic and personal projects. Eager to contribute to real-world software development projects while continuously enhancing technical skills and professional growth.

Education

Padang State Uninversity — **West Sumatera, Indonesia**
Bachelor in informatics | GPA: 3.78 / 4.00 — 2021 - 2025

Graduated with a GPA of 3.78/4.00 and completed a final-year thesis on Sentiment Analysis of Bibit Application User Reviews Using Naive Bayes and K-Nearest Neighbors (KNN), applying machine learning techniques to real-world text classification.

State Senior High School 113 Jakarta — **Jakarta, Indonesia**
High School in Natural Science Program (IPA) — 2017 - 2020

Work Exprerience

KPN Plantations — **Jakarta, Indonesia**
Web Programming Intern — Aug 2026 - Present

- Develop and maintain Enterprise GIS features for user management, access control, and plantation operations.
- Implement backend logic and SQL stored procedures for user access management and account status synchronization.
- Develop and integrate Digital Approval System (DAS) configuration modules and migrate legacy features into Enterprise GIS.
- Troubleshoot application issues and optimize data loading, filtering, searching, and rendering performance.
- Perform functional testing, integrate frontend and backend components, and manage code updates through GitHub.

PT Collega Inti Pratama — **Jakarta, Indonesia**
Programmer, Internship — Oct 2024 - Nov 2024

- Contributed to the development of E-Polis, a digital insurance platform using Vue.js and JavaScript.
- Developed RESTful APIs using Java Spring Boot and integrated PostgreSQL for database management.
- Integrated frontend and backend components to support application functionality and collaborated with the team to deliver reliable features.

PT Properti Sekuriti Indonesia **Jakarta, Indonesia**
Security Systems Engineer, Contract Employee Dec 2020 - Feb 2021

- Designed, installed, and configured security systems including CCTV and alarm devices, ensuring optimal performance through preventive maintenance.
- Diagnosed and repaired faults or malfunctions in security systems promptly and effectively.

Certification

- Problem Solving (Basic) - HackerRank (Feb 2026)
- Sertifikat Kelas Belajar JavaScript Dasar (Des 2025 - Des 2028)
- Sertifikat Kelas Belajar Dasar-dasar HTML dan CSS (Des 2025 - Des 2028)
- Java Pemograman Dasar - GameLab Indonesia (Nov 2025 - Nov 2028)
- Go Pemograman Dasar - GameLab Indonesia (Nov 2025 - Nov 2028)
- Getting Started with Data - IBM (Oct 2025)
- Machine Learning for Data Science Projects - IBM (Oct 2025)
- Data Classification and Summarization Using IBM Granite - IBM (Oct 2025)
- Web Development Fundamentals - IBM (Oct 2025)
- Belajar Prinsip Pemrograman SOLID - Dicoding (Oct 2025 - Oct 2028)
- Memulai Pemrograman dengan C - Dicoding (Oct 2025 - Oct 2028)
- Memulai Pemrograman dengan Java - Dicoding (Oct 2025 - Oct 2028)

Skills

Soft Skill

- Adaptability & Fast Learning
- Communication & Team Collaboration
- Hardworking and Dedicated
- Leadership
- Problem-Solving & Critical Thinking
- Time Management

Hard Skill

- Frontend Development: HTML5, CSS3, JavaScript, jQuery, Bootstrap, React.js, Vue.js, Axios, Async/Await
- Backend Development: C#, ASP.NET Web Forms, C# Web Services, Java Spring Boot, Laravel, Node.js, REST API Development, API Integration, API Testing, Input Validation, Authentication & Authorization, Error Handling, CRUD Operations
- Database: SQL, Stored Procedures, PostgreSQL, MySQL, SQLite
- Programming Languages: Python, Java, C, C++, Go (Basic)
- Development Tools: Git & GitHub, Visual Studio Code, IntelliJ IDEA, Postman, DBeaver
- Deployment & DevOps: Vercel, Microsoft Azure App Service, Web Deployment & Hosting
- Data & Machine Learning: Data Analysis & Data Visualization, Data Modeling, Sentiment Analysis, Machine Learning, Google Colab, RStudio, Tableau, Jupyter Notebook
- Office & Productivity: Microsoft Word, Microsoft Excel, Microsoft PowerPoint

Organization

Teaching Factory (TEFA) **Padang State University, Indonesia**
Member 2022

Participated as a member in the Teaching Factory program, focusing on deepening skills in web programming. Developed several projects to enhance expertise in web development using preferred and proficient programming languages.

Project Based Learning

Enterprise GIS & Digital Approval System (DAS) | KPN Plantations (2026)

Developed and enhanced enterprise application features for user management, access control, and approval configuration by integrating frontend interfaces, backend services, and database operations, while optimizing application performance and resolving technical issues.

Church Stage Service Scheduling System (2025)

Developed a web-based scheduling system for church stage services using Laravel. The system manages data on service periods, musical instruments, and personnel, and employs a Genetic Algorithm to automatically generate optimized schedules, ensuring fair distribution and efficiency in service planning.

Sentiment Analysis of Bibit App Reviews (2025)

Conducted sentiment analysis on user reviews of the Bibit investment app using Naïve Bayes and K-Nearest Neighbors (KNN) algorithms, providing insights into user perceptions and algorithm performance.

E-Polis Insurance System | PT Collega Inti Pratama (2024)

Developed a full-stack web application for managing digital insurance policies using Vue.js (frontend), Java Spring Boot (backend), and PostgreSQL. Implemented API integration and ensured a secure, scalable system.

Galaxy Store (2024)

Built an innovative mobile application using Flutter and Firebase that enables users to book mobile game boosting services easily and securely.

Weather App (2023)

Created a weather application using Node.js, integrated with weather API and IP address API for location-based forecasts.

Coffee Shop Management System (2023)

Implemented an innovative management system for a coffee shop using PHP and Bootstrap to streamline operations.

House Price Prediction using Linear Regression

Built a property price prediction model with Linear Regression to provide price estimates for buyers and sellers.

COVID-19 Spread Forecasting with ARIMA

Applied ARIMA modeling to forecast COVID-19 spread trends, aiding in prevention and control strategies.
